The E-Z Fab is a revolutionary new cutting & bevelling system for pipes. Ideally suited, but not limited to workshops, and high productivity process environments.

The E-Z Fab utilises a similar principle to our clamshell split frame cutting & bevelling machines.

However, the rotating, working inner ring is 1 piece, and is housed in a cast outer body, meaning strength, and rigidity... and speed. Due to its stability (and hugely in part due to the awesome 1.5kw Electric Servo Motor, we'll talk about that more later...) the fact that the ring is 1 piece means that it can rotate at high speed, whilst maintaining a stable, precise cut.
